

MODERATION PROCESS COMPLAINT

May 05, 2018

Today, on Saturday, May 05 2018, afternoon, as you may be informed, the server was restarted because of low TPS rates. The TPS rates kept sinking after the restart and some people suggested me being involved (as you may see on the following screen shots, some people were insulting me as well as expressing themselves in a very rude form, which is not acceptable at all, which might be seen on the following screen shots: 1, 2) , which was a total witch hunt and not true at all. I even got the local moderators checking me for any wrongdoings, which may be considered privacy breach (you may see a Moderator appearing in my home-hole on the following screen shot 15), which is quite weird, since there was no reason to check explicitly me.

At the time I was just recovering my home locations data after it's loss due to server migration, while the TPS rates kept sinking and I kept being blamed for the lags by various players, which are listed in this complaint as well as are clearly visible on the screen shots presented.

At some point, after I arrived at my next location, that was on the row to be restored in my /homelist, I noticed some weird things happening.

Suddenly, grum appeared in my vicinity, presumably teleported by the moderator involved, anhud. At this point I started suspecting something weird happening, when, suddenly, grum wrote in the chat that he is here to kill all mobs (clearly visible on screen shots 3 and on the following <https://www.youtube.com/watch?v=1HxLUQS1jMk> video).

It didn't take me a while till I realized he was talking about my beloved, closest friends – snowmen, that were living inside the current location I was on. After I warned him, that this was going to be considered grief, which is, according to the server rules, illegal and punishable (screen shot 3).

Meanwhile I noticed anhud writing something unusual – something about being a creep (everything described here is clearly visible on the following video <https://www.youtube.com/watch?v=1HxLUQS1jMk> and on screen shot 3). Shortly, he started sending extremely disturbing messages, as if he would have seen something scary ["bloody hell", "jesus", "bloody christ"] (as is visible on screen shot 4 as well as on the video <https://www.youtube.com/watch?v=1HxLUQS1jMk>).

At that point I discovered a quite large hole in the construction of my current location and proved it using the logblock block change log plugin, which indicated anhud's involvement in the structural integrity of this location as well as his presence and possible connection between his unusual messages that were sent earlier (also clearly visible on video <https://www.youtube.com/watch?v=rttNIOvONhw>). I was extremely surprised, since I knew I wasn't doing anything wrong and his actions actually caused some leaks of my beloved snowmen through the location, as well as some snowman deaths (indicated by the snowballs on the ground on screen shot 4).

Shortly after discovering all this and asking anhud to please close the entrance he digs in the future, to prevent leaking of my beloved snowmen, I was **banned** for a funny reason: "Stop
